CTAP REGION 10

Professional Development Services *Marzano Strategies Integrated with Technology*

Research has identified nine categories of learning strategies as being the most effective ways to increase student achievement. Technology can be an important part of the learning environment to help implement these strategies.

In this workshop, participants will learn to use Inspiration® software to help students improve their learning. Participants will explore how graphic organizers can help students understand and diagram similarities and differences and begin to recognize relationships between information pieces they are studying.

Registration: \$160

Includes: Inspiration® software, *Classroom Instruction that Works: Research-based Strategies for Increasing Student Achievement*, flash drive of resources

Register Now!

Visit <http://oms.sbcss.k12.ca.us/> and type "Marzano" into Search Scheduled Events.

CTAP Region 10 Data Teams

The success of any school in improving student achievement is dependent upon highly functioning collaborative groups of teachers that utilize data to help drive classroom instruction. **CTAP Region 10 Data Teams** is an interactive 3-day seminar that presents the Douglas Reeves', effective five-step data-driven decision-making process that supports professional learning groups and is combined with data dialogue and technology. Participants will utilize real student achievement data and classroom assessments to learn protocols and practical strategies to improve teaching and learning. **Participants will learn how to:** transform student data into improved teaching and learning outcomes; identify effective classroom strategies; use effective facilitation strategies for data conversations; and use technology data tools to help monitor at risk students.

Registration Fee: \$195.00

Included: Data Teams Workbook, InspireData™ Software, and Curriculum Guide
